Professional Summary

Software Engineer specializing in *Front-End* and user experience, with a background in Design and a solid foundation in visual communication. Possesses experience in developing digital products across various sectors, including insurance, oil and gas, telecommunications, entertainment, fintech, and financial services. Works collaboratively with business and product areas, aligning technical decisions with strategic objectives. Distinguished by strong communication skills, teamwork, and experience in mentoring developers.

Professional Experience

GBL Tech | Celfocus • **Client:** **Vodafone** • *Porto, Portugal* • *Period: Oct 2025 — present*

Working at GBL Tech, in partnership with Celfocus, developing and evolving frontend solutions for Vodafone's digital products. Focus on building scalable, high-performance, and accessible interfaces, contributing to improved customer journeys and digital workflows. Close collaboration with product, design, and backend teams, with an emphasis on code quality, component reuse, and enterprise-level applications.

- Development and evolution of landing pages using React 18 and TypeScript 5 within a microfrontend architecture, focusing on reusable components, strongly typed contracts, and modular UI organization to ensure scalability, visual consistency, and maintainability;
- Integration with Contentful for dynamic content management, including modeling of configurable content blocks and decoupling between presentation and content layers, enabling faster publishing workflows and reducing dependency on development cycles;
- Application of advanced frontend engineering practices in SPA environments, with a strong focus on performance, accessibility, and responsiveness, including optimizations such as lazy loading and code splitting, design system standardization, and adherence to enterprise architecture patterns in Agile/Scrum environments.

CORE TECHNOLOGIES: *React.js, TypeScript, Microfrontends, Contentful, Agile Methodology*

Ignit • **Client:** **Trains of Portugal | Popular Radio | Single Portal** • *Porto, Portugal* • *Period: jan 2024 — abr 2025*

Involved in the development of the new Comboios de Portugal application, a Progressive Web App (PWA) built with React, focused on improving the digital mobility experience. Strong focus on accessibility, user experience, and mobile-first optimization.

CORE TECHNOLOGIES: *React.js, TypeScript, Microfrontends, Contentful, Agile Methodology*

Involved in the development and optimization of the e-commerce platform for Rádio Popular, one of the leading electronics and home appliance retailers in Portugal. Focus on building a seamless shopping experience, with improvements in performance, usability, and accessibility.

CORE TECHNOLOGIES: *Vanilla JavaScript, PHP, Dynamic Search, Smart Filters, Performance Optimization, Responsive Web*

Experience as a Senior Frontend Developer in the development of the new version of the Single Portal - E-Portugal, a central platform for the modernization of digital public services in Portugal. Focus on performance, accessibility, and code quality, contributing to the creation of efficient and scalable digital experiences. Work in an agile environment, with strong collaboration between multidisciplinary teams.

CORE TECHNOLOGIES: *Next.js, TypeScript, ES6+,, Accessibility, Performance Optimization, Unit testing, Jira Software*

Ignít • **Client:** **AMA (Agency for Administrative Modernization)** • Porto, Portugal • Period: set 2023 — jan 2024

Working as a Frontend Developer in partnership with AMA on the development of an application. *Source Hub* Data processing for public services in Portugal. Contribution to the construction of modern, scalable, and user-centered interfaces, following frontend development standards and best practices.

CORE TECHNOLOGIES: *React.js, Progressive Web Apps (PWA), API Integration, Responsive Web Development, Accessibility, Performance Optimization*

Capgemini Engineer • **Client:** **Contentful** • Porto, Portugal • Period: Jun 2022 — Jul 2023

Experience as a Senior Software Engineering Consultant developing frontend solutions for the Contentful platform, a leading global headless CMS. Focus on defining frontend architecture, creating scalable features, and optimizing performance, contributing to a consistent user experience in a large-scale SaaS environment. Close collaboration with multidisciplinary teams in an agile context.

CORE TECHNOLOGIES: *React.js, TypeScript, ES6+, Redux Toolkit, Jest, React Testing Library, Frontend Architecture, Agile*

CI&T • **Client:** **Alelo** • Porto, Portugal • Period: out 2020 — abr 2022

Experience as a Frontend Developer developing interactive dashboards for Alelo, focused on monitoring business metrics such as revenue, consumption frequency, and sales performance. Creation of rich and scalable interfaces, focusing on data visualization, usability, and performance. Active participation in defining frontend architecture and best practices, in collaboration with multidisciplinary teams.

CORE TECHNOLOGIES: *React.js, JavaScript (ES6+), Styled Components, SASS, BEM, Node.js, Jest, React Testing Library, CI/CD, Performance Optimization, Accessibility*

Ativa Investimentos • Rio de Janeiro, Brazil • Period: fev 2020 — jun 2020

Role as Senior Frontend Developer in the development of a digital onboarding experience with an intuitive, fluid, and high-performance registration flow for an investment brokerage. Development of the frontend architecture, aligning technical solutions with UX proposals to improve usability and accessibility. Acting as a technical reference, supporting the team with best practices and decision-making.

CORE TECHNOLOGIES: *Vue.js, Vuex, JavaScript (ES6+), SASS, Node.js, Jest, Frontend Architecture, Performance Optimization, Accessibility*

Accenture • Client: **Oi** • Rio de Janeiro, Brazil • Period: September 2019 — December 2019

Role as IT Consultant in the development of the Oi Fibra microsite, focusing on creating high-performance, scalable interfaces geared towards component reuse. Contribution to defining the frontend architecture based on Atomic Design, implementing new functionalities, and improving performance and SEO through server-side rendering. Collaboration in an agile environment with multidisciplinary teams.

CORE TECHNOLOGIES: *React.js, Next.js, JavaScript, SASS, Atomic Design, Server-Side Rendering (SSR), Performance Optimization, SEO, Agile Methodology*

Altran • Client: **Globoplay** • Rio de Janeiro, Brazil • Period: September 2019 — December 2019

Role as Senior Application Developer in the development of the Globoplay Smart TV application, focused on improving the streaming experience across different devices. Contribution to the implementation of new features, interface improvement, and ensuring compatibility between multiple TV models. Participation in multidisciplinary teams, ensuring seamless integration and high-quality deliverables.

CORE TECHNOLOGIES: *React.js, Next.js, JavaScript, SASS, Atomic Design, Server-Side Rendering (SSR), Performance Optimization, SEO, Agile Methodology*

Pontifical Catholic University of Rio de Janeiro • Client: **GTEP** • Rio de Janeiro, Brazil • Period: set 2018 — may 2019

Experience as a Senior Frontend Developer developing solutions for planning, drilling, and managing oil well production. Contribution to the creation of real-time dashboards to support operational analysis, improving the management and efficiency of drilling processes. Evolution of desktop applications into modern web solutions, focusing on data visualization and usability. Close collaboration with engineers to ensure adherence to operational needs.

CORE TECHNOLOGIES: *Angular, TypeScript, ES6+, RxJS, D3.js, Recharts, Data Visualization, Real-time Applications, Performance*

Oi • Rio de Janeiro, Brazil • Period: jul 2017 — ago 2018

Role as Frontend Developer in the development of the public account management application for Oi customers, focusing on creating intuitive and accessible interfaces for configuring profiles and services. Contribution to the construction of reusable and scalable components following Atomic Design, as well as participation in the development of cross-platform solutions. Collaboration with multidisciplinary teams to align technical and business needs.

CORE TECHNOLOGIES: *React.js, Redux, Storybook, Angular, Ionic, Atomic Design, Responsive Web Development, Accessibility*
